JAM-RESISTANT ACTIVE GPS ANTENNA NOW AVAILABLE FOR USE WITH 3.3 V DC AND 5 V DC APPLICATIONS

Whatever the environment—the Trimble® Bullet™ III GPS antenna will perform, year after year. The Bullet III antenna provides a perfect solution for manufacturers who need a fixed-site, rooftop GPS antenna. This antenna is also a high-quality solution for adding GPS RF signals for marine GPS navigation systems.

Put it anywhere
The antenna is housed in weatherproof packaging designed to withstand exposure to shock, excessive vibration, extreme temperatures, rain, snow and sunlight.

The dome is all plastic, and the threaded socket in the base of the antenna is corrosion resistant. The threaded socket accepts either a 1˝-14˝ straight thread (typical marine antenna mount) or a 3/4˝ pipe thread.

The F-type or TNC antenna connector is located inside the threaded socket, which allows the antenna cable to be routed inside a mounting pole and protects the cable connection for added reliability.

Strong performance
The Bullet III antenna is an active GPS antenna with 35 dB preamp (5 V DC), 30 dB preamp (3.3 V DC). The high-gain preamp allows the Bullet III antenna to be used with up to 75 feet of RG-59 cable. The Bullet III filtering improves immunity to other RF signals for reliable performance in hostile RF jamming environments.

Proven reliability
For over 15 years, Trimble has sold GPS antennas renowned for their survivability in tough environments. The Bullet III antenna is the fourth generation of the proven Bullet antenna family and offers all the reliability and performance benefits that are required for GPS installations.

In unforgiving environments, an antenna failure could be disastrous. Don’t risk it. Select a proven GPS antenna—the Trimble Bullet III GPS antenna.
